PROFESSIONAL SUMMARY

Computer Science student with experience building full-stack applications using JavaScript, SQL, and REST APIs. Developed projects ranging from real-time sports tracking platforms to networking systems in Linux environments. Strong problem-solving skills with a focus on building practical, user-focused solutions.

EDUCATION

BACHELOR OF SCIENCE (B.Sc), HONS. IN COMPUTER SCIENCE

York University

2027

Toronto

High School Diploma

East York Collegiate Institute

2021

Toronto

WORK EXPERIENCE

Sales Associate

Best Buy

October 2025 – January 2026

Toronto

- Assisted customers in selecting smartphones, accessories, and consumer electronics based on needs, budget, and technical requirements.
- Collaborated with team members to manage high-traffic periods efficiently.
- Upsold accessories such as cases, screen protectors, chargers, and extended warranties to enhance customer experience.

IT Intern

Fauji Fertilizer Company

April 2025 – August 2025

International

- Completed enterprise network design project using Cisco Packet Tracer (VLANs, DHCP, routing).
- Gained hands-on exposure to data centre ops, VMware, and infrastructure monitoring tools.
- Studied firewalls, IDS/IPS, subnetting, and NGFW as part of security-focused training.

PROJECTS

Study Group Organizer App (In Progress) | JavaScript, Node.js, SQL

April 2026 – Present

- Developing a platform that helps students create and join study groups
- Designing features for scheduling, group matching, and collaboration
- Collaborating in a team environment on system design and implementation

Live Sports Tracking Website | SQL, REST APIs, Node.js, JavaScript

November 2025 – January 2026

- Built a web app that displays real-time scores for soccer, basketball, and football using external APIs
- Integrated SQL database for efficient data handling and faster load times
- Developed backend logic for API calls, data processing, and live updates

Linux DNS Server & Virtual Router | Linux, Networking

September 2025 – October 2025

- Configured a DNS server and virtual router to simulate real-world network systems
- Implemented routing and domain resolution using Linux tools
- Troubleshoot network issues to ensure stable connectivity

TECHNICAL SKILLS

Languages | Python, JavaScript, Java, C/C++, SQL

Frameworks | React, Node.js (Express), Django, Flask

Developer Tools | Git, Docker, Jenkins, Visual Studio Code, PyCharm, Eclipse

Libraries | Pandas, NumPy, Matplotlib, Bootstrap, jQuery
